Actifile

Backup. Protect. Retrieve.

Actifile is a software solution which allows businesses to securely and automatically backup data found across company laptops and desktops. Stored files can be found and retrieved almost instantly using Actifile's patented filtering system.

The Actifile Advantage:

- Reliable disaster protection allowing for quick data recovery from lost or broken devices
- Quick data retrieval to save companies time searching for files
- Higher levels of transparency due to increased team oversight by managers
- Only relevant data is backed up, saving organizations money on storage costs
- Simple to use, even for non-tech savvy employees
- Easy installation with no additional hardware or maintenance required

Other Key Features:

- Centralized cloud location for business data
- Information security through premier encryption technology
- Knowledge loss prevention through automatic backup
- Ability to grant access to individual employees based on different levels of permissions
- Security alerts to help companies meet compliance standards

About Actifile

Our mission is to help as many organizations as we can protect and control their digital information. We've created an enterprise-grade software that's easy to use and helps boost an organization's digital productivity by an average of 30%.

Our company is quickly expanding across the globe and servicing firms all over the world. As we've grown, we've established a team of global professionals dedicated to providing a world-class experience for our customers.

At Actifile, we're not satisfied with offering solutions that just work. We challenge ourselves to take an innovative approach on a day-to-day basis and see every challenge we face as an opportunity to grow and excel.
